

# Staff

We understand how important it is for us to be positive role-models on a lesson-by-lesson basis. We hope that our passion for teaching, and our subject area's, shines through in order to inspire the young people in front of us. Our commitment to the delivery of Careers Education in every classroom plays a crucial role in informing, educating and inspiring the next generation to be passionate, confident to have happy and successful futures.

After parents, many studies point to the crucial role of the subject teacher in transforming the career goals of our young people. Your passion for your subject can inspire our students to consider how they might move into a subject related profession.

As you will know, as part of Gatsby Benchmark 4 – Linking Careers to the curriculum, each subject teacher is required to embed careers related activities into their curriculum.

Each member of staff is playing a key part in a Subject Specific Careers Week at GSHS, this is in addition to the National Careers Week that we usually take part in. In 2023 there have already been whole-school initiatives for all staff to share best practice and learn from each other. Remember that there are already subject specific displays in each department, resources booklets, posters and much more around school to facilitate you in offering world class CEIAG. Also please also check the 'Careers BM4' folder on the G Drive for digital, editable resources shared by each department.

You can see, from the pictures below, staff taking part in the 'Careers Speed Dating/Give one Get One' activity, supported by our external partners from Connexions, NTLT, NELEP, our Enterprise Advisor from Equinor, Bernicia Homes and The Port of Blyth.

### Additional resources

The Careers and Enterprise Company (CEC) also have a huge range of resources and guidance on how to successfully deliver Careers education within subject areas. The following guidance, From The CEC, is designed to offer practical tips as well as case studies and examples that you could use.
