

Subject: iLearn

	<b>Term 1</b>	<b>Term 2</b>	<b>Term 3</b>	<b>Notes</b>
<b>Year 7</b>	<p>Introduction to and practise of the Learning Habits throughout the first half term. The second half term will involve students completing their first iLearn project of the year. This will be a History-orientated project with the goal of producing exhibits related to the local history of Killingworth, North Tyneside and Newcastle. These exhibits will be displayed in The Discovery Museum. The students will practise, and then be required to use, enquiry and research skills to determine the best sources and forms of information to produce their exhibits.</p> <p>Alongside further development of all the Learning Habits they will focus on presentation and working in groups towards a common goal.</p>	<p>Term Two will involve a Geography-orientated project looking at Fairtrade. This will include development of research skills, empathy and an introduction to human geography. Students will work in small groups to create a Fairtrade Toolkit for primary school children. This kit includes a game, a comic and some information leaflets, as well as the box to put them in. Students will have to research Fairtrade issues and design their toolkit. They will have to order the resources they need to make the final product.</p> <p>Alongside further development of all the Learning Habits they will focus on Planning, Communicating and Taking Responsibility.</p>	<p>The Final project has an RE and Philosophy focus with elements of Geography and Modern History supplementing the content. Each class must work together to produce a short film about a hero fighting against or solving a 'moral issue/world problem'</p> <p>Students will consider what makes people good/bad, choices and philosophical issues. They will also apply for roles, look at story writing, filming and editing skills and techniques whilst again working together, increasingly self-organised towards a 'public' showing of their films at The Tyneside Cinema.</p>	<p>iLearn takes a Project Based Learning approach to History Geography and RE. Where students are encouraged to use their Learning Habits to complete projects and challenges set each term.</p> <p>As with other Year 7 subjects iLearn has 3 Home Learning projects throughout the year. These are specifically designed to enhance and develop or provide a foundation for the work completed in each of the projects.</p>
